Part A – Program Basics & Contact Information

- ✓ There are two programs you can apply for: The Home Winterproofing Program from Enbridge Gas and Save On Energy's Energy Affordability Program on the electricity side. We can deliver both programs if you qualify and are interested.
- ✓ To find out if you qualify for the program, this form will ask questions about government benefits you may receive, your home's characteristics, and your income. Qualifying means you are eligible for an in-home visit. During our visit, we will:
 - A.** Install basic upgrades as necessary - these are things like efficient lighting, water efficient showerheads, water efficient tap aerators, advanced power bars, pipe/tank insulation for hot water tanks, and a carbon monoxide alarm.
 - B.** Record the age and efficiency of the following: thermostats, fridges, freezers, dehumidifiers, and A/C.
 - C.** If eligible (based on the age of your home and insulation details) we will record your home's actual insulation levels (basement, exterior walls, attic) as well as its air tightness and air leak locations.
- ✓ After our visit, we will use the assessor's notes and photographs to determine if you qualify for appliance upgrades and winterproofing upgrades (air sealing your home and insulating basements, exterior walls, and/or attics). You can expect a response within 10 business days of the visit.
